

HOME LEARNING AND COMMUNICATION

HOME LEARNING STATEMENT

At SFX, we know learning happens in many situations, both at school and at home. Often students will be asked to complete tasks to practice basic knowledge and skills at home to support their learning. This home learning relies on the partnership between families and schools to support student achievement.

We believe that reading skills are important in connecting learners with the world around them, and we encourage students to engage in daily reading at home, both independently and with families.

We also encourage the achievement of students' individual learning goals by asking students to either finish incomplete classroom tasks at home, or complete activities that support classroom programmes.

We believe that successful learning requires students to develop positive self-management and organisational skills in collaboration with school and families. To achieve this, we continue to work together with families to ensure students are supported in their learning.

HOME AND SCHOOL COMMUNICATION

In living out our school vision of being innovative, we support children in their self-management and organisational skills by using contemporary technologies to outline home learning requirements, expectations, learning progress, timelines, timetables and events.

Through our communication tools of SeeSaw and OneNote, we can efficiently share information amongst a group of people – students, parents and teachers. Information is consistent, clearly visible and instant, and shapes the future learning journey for our children.

To enable children to experience success, we are committed to continuing our collaborative relationship with families to support all students' learning.
